

CANINE EXTERNSHIP/PRACTICUM FOR CCRP CERTIFICATION

This program is held in Okotoks at our clinic location. The course is exclusively for Veterinarians, RVT and Physiotherapist attending the Canine Rehab Certification Course.

Please contact us for upcoming dates.

This is one on one hands on practicum. You will be working with the CCRP certified DVM side to side. The week before the practicum the student will receive a list of the conditions that will be presented during the practicum, so the student is able to get familiar with it and start to prepare a rehab protocol ahead. Anatomy and neurology will be reviewed in addition to rehab modality. During the practicum the student will work as well on how to write a medical record and proper cleaning protocol. The student will have access to our Canine Physical Rehabilitation library and didactic material.
